### Assessment Plans, Reports, & Dialogue

For instructional programs, all course learning outcomes and all program outcomes should be assessed in a 3-year cycle. Course level assessment results and dialogue are used to facilitate program outcome assessment. Program outcome assessment facilitates program improvement through dialogue and Program Review Plans. Student Services approach assessment through data collection, dialogue, and planning via Program Review. Below you will find links to course assessment and program assessment schedules as well as course level and program level assessment reports.
